CSS

CERTIFICATIONS

[Scrum Fundamentals Certified- SCRUMstudy](#)
[EF SET English Certificate 71/100 \(C2 Proficient\)](#)
Conversational English

ALBERTO SOLANO VILLALTA

SOFTWARE ENGINEER

EXPERIENCE

SOFTWARE ENGINEER

INTERNSHIP - WOLK SOFT

MARCH 2021 - MAY 2021

- I seamlessly integrated the Facebook Marketplace API into a point of sale system, resulting in a significant increase in business productivity. I thoroughly documented the usage of the API, providing concise and comprehensive instructions for its setup and operation.
- I implemented an intuitive pre-registration function on the web store, allowing customers to register before making purchases, utilizing technologies such as .NET Framework, Vue.js, Microsoft SQL Server, Visual Basic, and C#.

SOFTWARE ENGINEER

FREELANCEE

JANUARY 2024 -

- Implemented reusable and modular components, ensuring clean and easily maintainable code.
- Utilized Redux to manage the application state, ensuring efficient data handling in the user interface. Additionally, I designed and developed RESTful APIs to facilitate communication between the frontend and backend.
- Handled databases using MySQL, ensuring efficient storage and management of application data.
- Used Git for collaborating on code development and managing application versions, employing technologies such as Java (Spring Boot) and React.js.

PROJECTS

LABORATORIES PROJECT

Cenfotec University

- Developed initial screens, modification processes, and registration processes, maintaining a consistent user experience.
- Created dashboards for managers, added features for scheduling appointments and managing time slots, and implemented secure payments with PayPal.
- Used technologies such as C#, jQuery, JavaScript, SQL Server, Git, and Azure DevOps, following agile methodologies like Scrum.

ZHENAIR

Cenfotec University

- Developed the medical centers management screen that allows administrators to efficiently manage information.
- Created functions that allow users to manage their profiles.
- Implemented an interactive map that displays real-time information about air quality in different locations.
- Technologies used: AngularJS, Java (Spring Boot), MySQL.
